Work history

Nest Systems c.a.

Front-end web developer

Burnaby, BC · 2020-2023

Developed and maintained Wordpress websites for various clients involved in the tourism and commerce industries. Responsibilities included writing HTML, JavaScript, PHP and CSS, implementing responsiveness, collaborating with team members, working with API's, creating themes, custom blocks, and patterns with Wordpress, and preparing mockups and storyboards using Figma. Other responsibilities included the following:

- Generating ideas with team members and offering insightful solutions.
- Meeting tight deadlines with a cool head.
- Experience with APIs.
- Staying up to date with new technology and learning about new trends.
- Themes, custom blocks, and patterns with Wordpress.
- Take a PSD or Figma design into a functional website.
- Prepare mockups and storyboards.
